

Notice of Allowability	Application No.	Applicant(s)	
	10/578,411	BUSEY, ANDREW THOMAS	
	Examiner	Art Unit	
	Philip B. Tran	2455	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to 4/22/2009.
2. ☒ The allowed claim(s) is/are 1-4, 6-18, 20-32 and 34-42 (renumbered as claims 1-39).
3. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) ☐ All b) ☐ Some* c) ☐ None of the:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.

THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
 - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Primary Examiner, Art Unit 2455

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Ward (Reg. No. 40,216), the undersigned, on April 24, 2009.

3. The application has been amended as follows:

IN THE CLAIMS:

The claims of the invention have been amended as follows:

1. (Previously Presented) A method performed by at least one information handling system, the method comprising:

creating folders on a server information handling system in response requests submitted from a user over a network, a list of the folders to be displayed on a display device, within at least one web browser window connected to the server information handling system over the network, the web browser window having a result of a search by a first website in response to a search term query specified by the user, wherein the first website performs the search by outputting a web services call to a second website, and the second website performs the search in

Art Unit: 2455

response to the web services call and outputs the result of the search to the first website; and

in response to a command from the user via the web browser window, saving a selected portion of the result of the search on the server information handling system in a folder that is selected by the user from among the displayed list of folders.

2. (Previously Presented) The method of claim 1, wherein the result of the search is:

a result of a search of the website.

3. (Previously Presented) The method of claim 1, wherein the result of the search is:

a result of a search of the website, wherein the server information handling system outputs a web services call to the website, and wherein the website performs the search in response to the web services call and outputs the result of the search to the server information handling system.

4. (Previously Presented) The method of claim 1, wherein the website is a first website, and wherein the result of the search is:

a result of a search of at least a second website.

5. (Canceled)

6. (Previously Presented) The method of claim 1, further comprising:
translating from an original result of the search, wherein the original result has an XML format.

7. (Previously Presented) The method of claim 1, further comprising:
translating from an original result of the search, wherein the original result has a generic XML format.

8. (Previously Presented) The method of claim 1, further comprising:
translating from an original result of the search, wherein the original result has a non-XML format.

9. (Previously Presented) The method of claim 1, wherein the result of the search is rendered directly from an XML format.

10. (Previously Presented) The method of claim 1, wherein the result of the search has a non-XML format.

11. (Previously Presented) The method of claim 10, wherein the result of the search has an HTML format.

12. (Previously Presented) The method of claim 10, wherein the saving comprises:

translating the result of the search from the non-XML format into an XML format, and saving the XML-formatted information in the folder that is selected by the user from among the displayed list of folders.

13. (Previously Presented) The method of claim 1, further comprising: in the selected folder, marking the saved portion to identify whether it has been viewed by the user.

14. (Previously Presented) The method of claim 1, wherein the user is a first user, and the method further comprises:

in response to a command from the first user, selectively enabling access to the selected folder via the server information handling system by one or more second users specified by the first user.

15. (Currently Amended) A server information handling system, comprising: means for creating folders on the server information handling system in response requests submitted from a user over a network, a list of the folders to be displayed on a display device, within at least one web browser window connected to the server information handling system over the network, the web browser window having a result of a search by a first website in response to a search term query specified by

Art Unit: 2455

the user, wherein the first website outputs a web services call to a second website, the second website performs the search in response to the web services call and outputs the result of the search to the first website, **wherein the means for creating folders comprises a processor to execute instructions stored in a computer readable storage medium**; and

means for saving a selected portion of the result of the search on the server information handling system in a folder that is selected by the user from among the displayed list of folders, in response to a command from the user via the web browser window.

16. (Previously Presented) The system of claim 15, wherein the result of the search is:

a result of a search of the website.

17. (Previously Presented) The system of claim 15, wherein the result of the search is:

a result of a search of the website, wherein the server information handling system is for outputting a web services call to the website, and wherein the website is for performing the search in response to the web services call and outputting the result of the search to the server information handling system.

Art Unit: 2455

18. (Previously Presented) The system of claim 15, wherein the website is a first website, and wherein the result of the search is:

a result of a search of at least a second website.

19. (Canceled)

20. (Previously Presented) The system of claim 15, further comprising:

means for translating from an original result of the search, wherein the original result has an XML format.

21. (Previously Presented) The system of claim 15, further comprising:

means for translating from an original result of the search, wherein the original result has a generic XML format.

22. (Previously Presented) The system of claim 15, further comprising:

means for translating from an original result of the search, wherein the original result has a non-XML format.

23. (Previously Presented) The system of claim 15, wherein the result of the search is rendered directly from an XML format.

Art Unit: 2455

24. (Previously Presented) The system of claim 15, wherein the result of the search has a non-XML format.

25. (Previously Presented) The system of claim 24, wherein the result of the search has an HTML format.

26. (Previously Presented) The system of claim 24, wherein the means for saving comprises :

means for translating the result of the search from the non-XML format into an XML format, and means for saving the XML-formatted information in the folder that is selected by the user from among the displayed list of folders.

27. (Previously Presented) The system of claim 15, further comprising:

means for marking the saved portion to identify whether it has been viewed by the user.

28. (Previously Presented) The system of claim 15, wherein the user is a first user, and wherein the system further comprises:

means for selectively enabling access to the selected folder via the server information handling system by one or more second users specified by the first user, in response to a command from the first user.

Art Unit: 2455

29. (Currently Amended) A computer program product storing at least one computer program **embedded in a computer readable storage medium, which when executed** processable by at least one information handling system, **causes** for causing the information handling system to perform a method comprising:

creating folders on a server information handling system in response requests submitted from a user over a network, a list of the folders to be displayed on a display device, within at least one web browser window connected to the server information handling system over the network, the web browser window having a result of a search by a first website in response to a search term query specified by the user, wherein the first website outputs a web services call to a second website, the second website performs the search in response to the web services call and outputs the result of the search to the first website; and

in response to a command from the user via the web browser window, saving a selected portion of the result of the search on the server information handling system in a folder that is selected by the user from among the displayed list of folders.

30. (Previously Presented) The computer program product of claim 29, wherein the result of the search is:

a result of a search of the website.

31. (Previously Presented) The computer program product of claim 29, wherein the result of the search is:

Art Unit: 2455

a result of a search of the website, wherein the server information handling system is for outputting a web services call to the website, and wherein the website is for performing the search in response to the web services call and outputting the result of the search to the server information handling system.

32. (Previously Presented) The computer program product of claim 29, wherein the website is a first website, and wherein the result of the search is:

a result of a search of at least a second website.

33. (Canceled)

34. (Previously Presented) The computer program product of claim 29, wherein the method further comprises:

translating from an original result of the search, wherein the original result has an XML format.

35. (Previously Presented) The computer program product of claim 29, wherein the method further comprises:

translating from an original result of the search, wherein the original result has a generic XML format.

Art Unit: 2455

36. (Previously Presented) The computer program product of claim 29, wherein the method further comprises:

translating from an original result of the search, wherein the original result has a non-XML format.

37. (Previously Presented) The computer program product of claim 29, wherein the result of the search is rendered directly from an XML format.

38. (Previously Presented) The computer program product of claim 29, wherein the result of the search has a non-XML format.

39. (Previously Presented) The computer program product of claim 38, wherein the result of the search has an HTML format.

40. (Previously Presented) The computer program product of claim 38, wherein the saving further comprises:

translating the result of the search from the non-XML format into an XML format, and saving the XML-formatted information in the folder that is selected by the user from among the displayed list of folders.

41. (Previously Presented) The computer program product of claim 29, wherein the method further comprises:

Art Unit: 2455

in the selected folder, marking the saved portion to identify whether it has been viewed by the user.

42. (Previously Presented) The computer program product of claim 29, wherein the user is a first user, and the method further comprises:

in response to a command from the first user, selectively enabling access to the selected folder via the server information handling system by one or more second users specified by the first user.

ALLOWABLE SUBJECT MATTER

4. Claims 1-4, 6-18, 20-32 and 34-42 (renumbered as claims 1-39) are allowable over the prior art of record.

5. The following is an examiner's statements of reason for allowance:

The examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims. The prior art of record fails to teach or suggest a method performed by and a system of at least one information handling system comprising creating folders on a server information handling system in response requests submitted from a user over a network, a list of the folders to be displayed on a display device, within at least one web browser window connected to the server information handling system over the network,

Art Unit: 2455

the web browser window having a result of a search by a first website in response to a search term query specified by the user, wherein the first website performs the search by outputting a web services call to a second website, and the second website performs the search in response to the web services call and outputs the result of the search to the first website, and in response to a command from the user via the web browser window, saving a selected portion of the result of the search on the server information handling system in a folder that is selected by the user from among the displayed list of folders.

6. Examiner interprets the limitation "computer-readable medium" as a device that stores computer instructions and participates in providing the computer instructions to a computer processor for execution. The computer-readable medium includes non-volatile media, volatile media, computer storage devices and memories. For example, optical or magnetic disks, ROMs, PROMs, EPROMs, EEPROMs, RAM, hard disks, CDs, DVDs. The "computer-readable medium" does not include acoustic or electromagnetic waves, such as those generated during radio-wave, infra-red, and optical data communications.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip B. Tran whose telephone number is (571) 272-3991. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
